linkedin.com/in/teddygandon
+33 6 62 46 70 28
moi@teddygandon.com

Bengaluru, India
Paris, France

NICE & SOFT SKILLS

- People leadership
- Stakeholder management
- Communication
- Problem solving
- Emotional intelligence
- Curiosity

SIDE PROJECTS

The First Spine
thefirstspine.fr
My biggest personal project so far — a solo-developed board game, mostly open source. NestJS, Docker, Ansible.

Drifter's Tales
store.steampowered.com
Dark fantasy card battler, 13 branching stories. Released 2022.

EDUCATION

2009
BTS (2-year degree), Multimedia Integration
Autograf, Paris, France

2007
Baccalauréat ES
Château-Thierry, France

PROFILE

Head of Engineering with nearly two decades in software and **12 years** leading teams, from startup CTO to manager of managers. Currently leading **30+ outsourced engineers** worldwide through engineering managers, building internal platforms (marketing, financial, video) for the music industry.

Hands-on and pragmatic, guided by three core actions: leading, developing and innovating. Track record of growing autonomous, multicultural teams across India, France and Poland, and of bringing AI-assisted engineering into everyday delivery.

EXPERIENCE

2026 – Present // Believe // *Head of Engineering, outsourcing*

Leading outsourcing through the BTech Alliance framework, across all outsourced teams globally.

- Drive **30+ engineers** worldwide through engineering managers, owning delivery of several internal platforms for the music industry
- Scale the operational framework across outsourced teams for faster onboarding and better delivery
- Bring AI-assisted engineering (Claude, Gemini) into the squads' day-to-day work

2022 – 2026 // Believe // *Engineering Manager*

Owned delivery of internal products, bridging product and engineering.

- Managed **3 engineering managers** and **3 squads** building financial reporting, internal marketing tools and an internal video management platform
- Personally hired **10 engineers**, kept turnover low, coached engineers and managers
- Designed the operational framework (processes, workflows, tools, management)

2015 – 2021 // Jellyfish (formerly Tradelab) // *Senior Backend Team Lead*

Promoted from Senior Backend Engineer to team lead in 2017, leading **3 backend engineers**.

- Designed and built backend applications for high-volume programmatic bidding
- Drawing on prior CTO experience, coached engineers into management roles

2011 – 2015 // One Heart Communication // *Chief Technology Officer*

Reporting to the CEO of a startup, owned the technology and the CRM platform built for nonprofit crowdsourcing and fundraising.

- Owned the architecture and delivery of a custom CRM on a pragmatic PHP/Symfony stack
- Managed and coached a hybrid team of **6 developers** (3 in-house, 3 outsourced) and oversaw the Polish branch

2007 – 2011 // Cho You // *PHP, JavaScript, ActionScript engineer*

Designed and built rich internet applications and marketing tools for big tech clients.

HARD SKILLS & OBSESSIONS

Leadership	Managing managers, hiring, coaching & mentoring, operational frameworks, intercultural & outsourced team management
Technical	JavaScript + TypeScript (NestJS, Angular, React, Vue), PHP (Symfony, Laravel), SQL (MySQL, Postgres), NoSQL (MongoDB, Elastic, Redis), RabbitMQ, C#, Cloud (AWS, GCP), Containerization (Kubernetes, Docker, Compose), Terraform, Ansible, Git, AI-assisted engineering (Claude, Gemini)
Project management	Agile & delivery frameworks (Scrum, Kanban, Lean), roadmapping, release planning, OKRs, risk management, RACI, Atlassian Suite (Jira, Confluence, Product Discovery)
Others	Adobe Suite, Unity, Blender, and obviously game design. Yes.
