Bengaluru, India
Paris, France

NICE & SOFT SKILLS

- People leadership
- Stakeholder management
- Communication
- Problem solving
- Emotional intelligence
- Curiosity

SIDE PROJECTS

Portfolio
teddygandon.github.io
Personal portfolio for presenting my projects & my own obsessions. AI-driven development, Vue.js, GitHub Actions.

The First Spine
thefirstspine.fr
My biggest personal project so far — a solo-developed board game, mostly open source. NestJS, Docker, Ansible.

EDUCATION

2009
BTS (2-year degree), Multimedia Integration
Autograf, Paris, France

2007
Baccalauréat ES
Château-Thierry, France

PROFILE

Senior Engineering Manager with nearly two decades in software and 12 years leading teams, from startup CTO to manager of managers. Currently leading 20 engineers in three squads in India, building internal products (marketing, financial, video) for the music industry.

Hands-on and pragmatic, guided by three core actions: leading, developing and innovating. Track record of growing autonomous, multicultural teams across India, France and Poland, and of bringing AI-assisted engineering into everyday delivery.

EXPERIENCE

- **2022 – Present // Believe // Engineering Manager**
Owning delivery of internal products, bridging product and engineering.
 - Manage 3 engineering managers and 3 squads building financial reporting, internal marketing tools and an internal video management platform
 - Personally hired 10 engineers, kept turnover low and grew engineers and managers through coaching and upskilling
 - Rolled out an operational framework (processes, workflows, tools, management), bringing faster onboarding, clearer roles, horizontal scaling, better delivery and operational excellence
 - Introduced AI-assisted engineering (Claude, Gemini) into the squads' day-to-day work
- **2015 – 2021 // Jellyfish (formerly Tradelab) // Senior Backend Team Lead**
Joined as Senior Backend Engineer and promoted to team lead in 2017, leading 3 backend engineers building digital marketing applications.
 - Designed and built backend applications for high-volume programmatic bidding
 - Managed and mentored the team, owning technical decisions and delivery
 - Drawing on prior CTO experience, coached engineers into management roles
- **2011 – 2015 // One Heart Communication // Chief Technology Officer**
Reporting directly to the CEO of a startup, owned the technology and the CRM platform built for crowdsourcing and fundraising needs of nonprofits and social enterprises.
 - Owned the architecture and delivery of a custom CRM on a pragmatic PHP/Symfony stack
 - Managed and coached a hybrid team of 6 developers (3 in-house, 3 outsourced) and oversaw the Polish branch
- **2007 – 2011 // Cho You // PHP, JavaScript, ActionScript engineer**
Designed and built rich internet applications (RIA) and marketing tools, combining GUI design and technical implementation.
 - Prototyped rich interactive applications and visual guidelines for big tech clients

HARD SKILLS & OBSESSIONS

Leadership	Managing managers, hiring, coaching & mentoring, operational frameworks, intercultural & outsourced team management
Technical	JavaScript + TypeScript (NestJS, Angular, React, Vue), PHP (Symfony, Laravel), SQL (MySQL, Postgres), NoSQL (MongoDB, Elastic, Redis), RabbitMQ, C#, Cloud (AWS, GCP), Containerization (Kubernetes, Docker, Compose), Terraform, Ansible, Git, AI-assisted engineering (Claude, Gemini)
Project management	Agile & delivery frameworks (Scrum, Kanban, Lean), roadmapping, release planning, OKRs, risk management, RACI, Atlassian Suite (Jira, Confluence, Product Discovery)
Others	Adobe Suite, Unity, Blender, and obviously game design. Yes.
